Lightweight Sturdy Long-lasting

For more fun afloat, nothing delivers like a Quicksilver aluminium boat. Whether you go fishing, like waterskiing, or just want to get away from the crowd, there's a feature-packed Quicksilver boat for you.

Quicksilver boats are built by Mercury Marine, the world's leading marine engine supplier. In the Mercury tradition, these boats are lightweight, sturdy and long-lasting. Choose from seven forest green, fully portable, feature packed models, all with a full five-year warranty on the structural integrity of their hulls.

The new ultralight flat bottom 310FB and 365FB are just what fishermen have been asking for.

The quick-planing Quicksilver 355SL and 410SL models are for more sheltered waters. The high freeboard Quicksilver 450SF, 450DLX and 500SF are designed to take up to a 30HP and 40HP outboard respectively. They come complete with fishing rod holders (except 450DLX) and a fuel tank platform.

Choose the Quicksilver to suit your needs - and whichever one you choose, you are assured of quality materials and workmanship throughout, brought together to give your boat a long working life, no matter what the conditions.

Quality construction makes Quicksilvers special. Kilo for kilo, their high-grade marine aluminium 5052 H32 alloy is twice as strong as fibreglass. Full width marine plywood reinforcements ensure transom strength. All standard wooden parts on each boat are pressure treated for longevity. A double row of rivets, in a stress-reducing zigzag pattern, reinforce the transom. Every boat is tank tested under rigorous quality control procedures to ensure water tightness. Noise dampening under-seat foam assures level flotation, even with a full load. Interiors are treated with a low glare anti-skid finish.

Standard features on all models include an easy planing modified vee hull, bow eye, lifting handles, oar locks (except 450DLX) and a transom drain plug.

Your Quicksilver aluminium boats dealership has earned the right to stock Quicksilver parts and has been trained to provide you and your Mercury or Mariner outboard with after-sales support.

Only Quicksilver parts are precision-made to fit your outboard and keep it running in top condition. Genuine, quality Quicksilver parts, backed by an exclusive product warranty.

The Very Best in Outboard Power

The perfect power for every model Quicksilver aluminium boat is a reliable Mercury or Mariner 2-Stroke or 4-Stroke outboard engine. Depending on the size of boat, you can fit up to 40HP of power.

These are leading outboards from the world's largest pleasure boat engine group. Versatile performance engines which are loaded with features. They've been designed to start fast and easily, time after time and to be sheer pleasure to use once you are underway.

Each Quicksilver boat dealer is fully qualified and equipped to maintain your Mercury or Mariner engine in tip-top condition at all times.

Quicksilver 450 DLX

The 450DLX combines an easy to walk on floor with the traditional performance of a V-bottom hull. Spray chines throw water away from the boat to give you a dry ride, even in choppy water.

The split centre seat permits easier movement in the boat. Fishermen and boaters alike will really appreciate the two closed storage compartments for gear and equipment. The port compartment is watertight and can be used as a live well. For extra comfort, the seats are topped with a weather resistant vinyl covered pad.

Flat-Bottom series

Here are the boats that serious fishermen have been waiting for. No more backbreaking lifting: These boats weigh less than a third of the weight of similar size rotationally moulded boats. This means that they are easier to pull out of the water, easier to load on a trailer and easy to flip upside down for storage. They are so light that it only takes 1 person to load the boat on the roof of a car.

Long lasting : Welded seams are your guarantee of water-tightness and Quicksilver's marine quality aluminium is not subject to ultraviolet degradation.

Safe and secure : Like all Quicksilver aluminium boats, these craft are unsinkable with 3 foam-filled flotation seats. Of course they are CE approved.

Economical to operate : Thanks to their light weight and flat bottom they will plane with only minimum horsepower. And a light weight boat is less expensive to tow behind your car.

Easy to customize : The all aluminium construction means that it's easy to attach fishing rod holders, anchoring systems, accessory clips, etc. with simple pop-rivets or nuts and bolts.

For your peace of mind, all Quicksilver aluminium boats are designed and built to meet the new European boat regulations. This is also your assurance of greater resale value when it's time to trade-in for a new boat. Every new Quicksilver aluminium boat carries the CE mark on the capacity plate attached to the transom. All boats are built according to an ISO 9001:2000 international quality standard.
