

Tender – Sport – Professional

Based in the north of Portugal, near the Spanish border, VALIANT is one of the largest European manufactures of semi-rigid craft. In 2003, the powerful BRUNSWICK Group, the world leader in motorboats, decided to extend its sales to the general public and acquired the VALIANT company. With 20 000 people working in 130 different countries, BRUNSWICK owns famous brands including SEALINE, BAYLINER, SEA RAY, HATTERAS, CABO, BOSTON WHALER, QUICKSILVER and also the MERCURY, MARINER and MERCUISER marine engines.

Valiant is part of Brunswick Corporation, world leading manufacturer of boat engines and recreational craft.

Why choose a semi-rigid? Its advantages include :

Comfort: The tube acts as a permanent buffer in the waves. The crew will tire less in heavy seas.

Stability: On an inflatable, the centre of gravity is lower than on a fibreglass hull. When stationary, the semi-rigid craft rolls less, thanks to its tube. It therefore feels safer to passengers.

Safety: With between 3 and 8 separate inflated chambers, and sometimes more, the tube will retain its form without altering the boat's performance even if one chamber is damaged. Even in the event of significant damage to the hull, the tube alone is capable of ensuring the buoyancy of the craft and consequently of the people on board.

Ecology: The lightness of a semi-rigid craft means that a less powerful engine is needed for the same performance than on a fibreglass boat. That means less investment, lower maintenance costs, lower consumption and considerably reduced pollution.

Occupancy: For identical dimensions, a semi-rigid craft will carry a larger number of persons. A 5,5 m semi-rigid could take 8 to 10 people compared with only 5 or 6 in a fibreglass boat.

Lightness: The low weight of a semi-rigid craft makes it easy to transport using the great majority of vehicles on the market.

What fabric is most suitable for your purposes?

HAKU® PVC for sports use : DYNAMIC, VANGUARD and DR series

The PVC which we use was specially developed for the VALIANT by the German group MEHLER Technologies. Using a high tenacity 1100 Decitex fabric with very high quality coating produces a PVC which is extremely resistant to UV rays.

AKRON® PU for professional use : DR series

This revolutionary high tenacity fabric (1870 Decitex) was developed more than ten years ago and was specially designed for VALIANT professional craft. As well as the fact that it can be thermo-welded like PVC, it also has five times more resistance to abrasion than Neoprene/Hypalon. This Fabric has received SOLAS certification issued by LLOYD'S REGISTER no ASS030012.

What are the advantages of VALIANT?

Extensive experience in semi-rigid craft

With more than 15 years' experience in manufacturing semi-rigid professional boats, VALIANT has improved its construction techniques for both hulls and tubes down the years. After acquisition by the world's leading motorboat group Brunswick, VALIANT improved still further, benefiting from the technological support of the group's other production sites.

A high quality thermo-welding technique

VALIANT makes exclusive use of the technique of THERMO WELDING when assembling the HAKU® PVC or AKRON® Polyurethane fabric of its tubes. This process combines fusion with high pressure bonding of double internal/external tapes, and is used to assemble the different parts of the tubes with welds stronger than the material itself.

A high-tech lamination process

Derived from technology developed in the aeronautical industry, the semi-rigid Valiant craft use very advanced vacuum and injection moulding achieving an excellent weight/rigidity/reliability ratio.

Tested under extreme conditions

All new models are severely tested in the Atlantic Ocean, taking advantage of the sometimes extreme conditions found along the Portuguese and Spanish coasts.

VALIANT: guarantees and certification

In 2001, VALIANT received ISO 9001:2000 certification for the design, manufacture and repair of semi-rigid craft.

Built to last

Each VALIANT model has been carefully designed to guarantee optimum performance. Our highly qualified technical staff rely on the most up to date CAD/CAM technologies at every stage in project design, planning and development.

The VALIANT manufacturing process has been established with the aim of producing boats of a high and uniform standard. That's why we offer **one of the best guarantees in the inflatable market**: five years on assembly joints, **5 years on HAKU® PVC fabric and 10 years on AKRON® Polyurethane fabric**.

Some models in the VALIANT professional range have received SOLAS certification. This certification is proof of industrial quality, with exceptionally high standards for design, reliability and safety.

Engine details

THE VERY BEST IN ENGINE POWER AND NAVIGATION

Choose among our vast range of robust and powerful Mercury or Mariner outboard engines, the most appreciated of all times. You'll have the very best and most up-to-the-minute engine power to take your boat out to enjoy the delights of the water.

Moreover, you will benefit from a national and international network of dealers.

On top of this, a five-year warranty program is applicable for all eligible Mercury and Mariner outboard engines*. The program will be offered to owners of new Mercury and Mariner outboard engines**. The warranty applies to Mercury and Mariner Verado®, OptiMax® and FourStroke engines purchased in Europe, the Middle East, Africa and the CIS region. The five years of comprehensive factory-backed coverage includes labor for failures caused by defects in material or workmanship. What's more, the new warranty is transferable if the engine is sold within the five-year period. The warranty applies to recreational use only. Warranties on high performance engines and engines used for racing or commercial purposes remain unchanged.

*Conditions and exclusions apply. Promotion excludes Mercury Racing and Mercury Performance Products.

**Provided that all extended warranty conditions are met.

OUTBOARDS

➤ **Mercury:** Being the “#1 On The Water™” means leading the way in every aspect. From products to service to customer satisfaction, Mercury outperforms the competition at every turn. With Verado® for example, Mercury offers an exclusive engine concept that delivers the best 2 stroke performance in a 4 stroke package, with convenience- enhancing features that make every boat ride a unique experience. If your passion is water sports then Mercury OptiMax® is your power of choice. Mercury OptiMax® delivers 2 stroke performance with 4 stroke-like exhaust emission and fuel consumption. Mercury is also the leader in 4 stroke technology with the most modern range of 4 stroke outboards in the industry.

4 STROKE

Intake, compression, power, exhaust. Those are the stages of four-cycle combustion. Because every combustion series consists of four discrete stages, 4 stroke engines tend to be quieter, smoother and more fuel efficient than traditional 2 strokes, all while producing lower emissions.

VERADO® SUPERCHARGED

Before Verado®, conventional 4 stroke outboards were reliable, but disappointing on performance. The revolutionary Verado® 4 stroke changed that by combining unmatched acceleration and responsiveness, unbeatable torque, precise control and ultra quiet operation, with industry-leading reliability.

OPTIMAX®

A Direct Injected engine that combines the heart, soul, speed and power of a traditional 2 stroke, but with the advantages of a 4 stroke. Its unique two-stage injection system creates a remarkably complete combustion – which means boaters can have a great time on the water while feeling good about conserving fuel and producing fewer emissions.

➤ **Mariner:** At Mariner we never forget the reasons why people choose boating as a hobby. No other sport offers you more possibilities to have fun than boating.

Since you buy a boat for the fun of it, it's important to specify an outboard engine that will help you get the most pleasure from your preferred boating experience. Mariner outboards will ensure you have complete confidence and peace of mind to relax and enjoy.

Mariner outboards are available in a full range of 2 stroke, 4 stroke and supercharged configurations.

Brunswick Marine in EMEA continuously explores means to improve the products it designs, manufactures and distributes. Every effort is made to produce sales and service literature which is current. Changes to specifications of engines, boats and accessories are ongoing. This brochure should not be regarded as a precise guide to the latest specifications. This brochure is also not an offer for sales of any particular engine, boat or accessory. Distributors and dealers are not agents of Brunswick Marine in EMEA or one of its affiliates and they have no authority to bind Brunswick Marine in EMEA by any express undertaking or representation, including but not limited to representations of product, sales, applications or service nature. Not all products are available in all countries and some are available only in limited quantities. Some products shown in this catalogue are equipped with optional accessories. Please see your local dealer. Visit <http://www.BrunswickMarineEMEA.com>
