Who are we?

BLACK FIN ELEGANCE

The synergy and the long experience in the nautical industry of both Mercury Marine and Nuova Jolly companies have led to the creation of the new Black Fin Elegance semi rigid brand which has been launched in 2007.

Aggressive, speed and elegance as a black fin, are the unique and common features of few marine predators. The **Black Fin Elegance** offers a range of complete packaging of superior quality with numerous accessories included as standard at a competitive price!

The Black Fin Elegance includes eight models: 34', 28', 25', 23', 21', 20', 19' and 18'.

Forty-five years of experience in the design and construction of inflatable craft, has allowed Nuova Jolly to develop an outstanding design which provides new standards in terms of safety, high level of comfort and performances.

The unique design of the hull in a deep-V shape improves the Rib

stability and its comfort making the Black Fin Elegance extremely seaworthy even in rough conditions; it also makes the installation of outboard engines much easier.

The Black Fin ribs are all manufactured with the highest quality of material and technologies such as the NI gelcoat isofallic base and multi-axial reinforcement. The tubes are made in Neoprene Hypalon of 1670 d-tex.

The use of isophthalic/neopentyl gel-coat on the hull guarantees:

- **Outstanding resistance to sunlight**
- **Excellent defense against osmosis**
- **High protection against scratches and abrasion**

Black Fin 34', as well as models Black Fin 28', 25', 23', 20' and 18' features a "Hi-Power" hull with layers of multi-axial reinforcement fabric.

This multi-axial fabric gives the

following benefits:

- **High degree of resistance against breakage**
- **Higher degree of rigidity**
- **Greater load capacity in any weather conditions**
- **Allows the installation of higher power engine**

Two new models join the current Elegance line this year: the Black Fin 19' and the Black Fin 21'. These two ribs increase our range of smaller capacity boat offering the features and outstanding quality of the Elegance line.

MERCURY MARINE

Mercury marine worldwide leader in nautical propulsion with brands:

Mercury, Mariner, Mercury MerCruiser®, Mercury Racing, SmartCraft®, MotorGuide® and Quicksilver, Mercury Marine it is a division of the holding Brunswick Corporation.

Brunswick Marine in Italy, Italian branch, distributes in its national territory, the outboard engines Mercury, the sterndrive engines Mercury MerCruiser and electrical engines MotorGuide, boats Quicksilver, inflatables and Ribs Valiant, Mercury and Black Fin, parts and accessories and lubricant Quicksilver.

The package Black Fin offers the following Mercury leading edge outboards propulsion:

4-STROKE

The first four-stroke EFI outboard engines introduced in the nautical market, available from 40 HP to 150 HP, they assure reliability, performance and low fuel consumption.

OPTIMAX®

The TwoStroke direct injection range available from 75 to 250 HP, they represent the evolution of the old two stroke technology. They granted full environment respect, low fuel consumption and quiet performance.

VERADO®

Electro-hydraulic power steering and SmartCraft Digital Throttle & Shift provide for an exceptionally smooth and responsive driving experience, that its was revolution the worldwide outboards engines concept. Acceleration, speed, full control in every condition, superior consumption efficiency, reliability... those are the futures of Mercury Verado engine.

350
SCI

VERADO 350 SCI:
REFINEMENT
WITH ROAR

From the top cowl to the all new gearcase, this engine is designed to exceed consumer expectations in product quality, reliability and performance.

The Verado 350 SCi combines the brains of Verado with the brawn of Mercury Racing. The 2.6 Litter supercharged engine features electronically controlled sequential multi-port fuel injection, four valves per cylinder, double overhead cam design, a charge-air cooler and electronic boost bypass control.
