Thank You
Thank you for choosing MotorGuide, one of the finest trolling motors available. Years of experience have been committed to the goal of producing the finest quality products. This led to MotorGuide's reputation for strict quality control, excellence, durability, long-lasting performance and being the best at providing after-the-sale service and support.

Please read this manual carefully before operating your motor. This manual has been prepared to assist you in the operation, safe use, and care of your trolling motor.

Again, thank you for your confidence in MotorGuide.

NEVER STOP LEARNING, NEVER STOP IMPROVING, AND NEVER, EVER STOP FISHING.

Warranty Message
The product you have purchased comes with a One-Year Limited Warranty from MotorGuide, the terms of the policy are set forth in the Warranty Information section of this manual. The policy statement contains a description of the duration of coverage, important disclaimers and limitations of damages, and other related information. Please review this important information.

The description and specifications contained herein were in effect at the time this manual was approved for printing. Mercury Marine, whose policy is one of continued improvement, reserves the right to discontinue models at any time, to change specifications, designs, methods, or procedures without notice and without incurring obligation.

MotorGuide Limited One-Year Warranty

KEEP YOUR ORIGINAL PURCHASE RECEIPT

1. To obtain warranty service, the purchaser should return the unit (postage prepaid and insured) to MotorGuide at 4433 West 49th Street, Tulsa, OK 74107. **DO NOT RETURN TO PLACE OF PURCHASE.** Products returned by mail should also be carefully packaged and include a note describing the nature of the problem and customer contact information. A copy of the proof of purchase is required with the return of the product for warranty consideration. Warranty claims will not be accepted without presentation of purchase receipt for trolling motor or Bill of Sale for boat package.

2. MotorGuide electric trolling motors are warranted to the original purchaser to be free from defects in material and/or workmanship for one (1) year. Warranty is **NOT** transferable to any subsequent purchaser.

3. MotorGuide, at its discretion, will repair or replace items covered under the terms of this warranty. Neither MotorGuide nor MotorGuide Service Dealers are responsible for damages to MotorGuide products due to repairs performed by anyone other than the MotorGuide Factory Service Center. Neither MotorGuide nor Mercury Marine is responsible for failure or damage caused by improper installation, set-up, preparation, or previous service or repair errors.
4. Warranty coverage is available only to customers that purchase from a Dealer authorized by MotorGuide/Mercury Marine to distribute the product in the country in which the sale occurred. Warranty coverage and duration varies by the country in which the product resides. This warranty applies to Thruster series MotorGuide Trolling Motors sold and residing in the United States. This Limited Warranty begins on the date the product is first sold to a purchaser or the date on which the product is first put into service, whichever occurs first. MotorGuide Accessories are covered by this Limited Warranty for a coverage period of one (1) year from the date of retail sale. The repair or replacement of parts, or the performance of service under this warranty, does not extend the life of this warranty beyond its original expiration date. Promotional warranties are not included in this statement and coverage may vary by promotion. Product either sold or put into service more than six years from date of manufacture is excluded from warranty coverage.

5. This warranty does not apply to normal worn parts, i.e., worn cables, adjustments, or product damage due to; 1) neglect, lack of maintenance, accident, abnormal operation or improper installation or service; 2) abuse, i.e., bent metal columns, bent armature shafts, broken control cables, etc., accidents, modifications, misuse, excessive wear or damage caused by an owner’s failure to provide reasonable and necessary installation or care; 3) use of an accessory or part not manufactured by MotorGuide/Mercury; 4) alteration or removal of parts; 5) opening the lower unit (motor) by anyone other than the Factory Service Center will void this warranty.

6. This warranty will not apply to 1) haul out, launch, towing and storage, transportation charges and/or travel time, telephone or rental charges of any type, inconvenience, or loss of time or income, or other consequential damages.

7. We reserve the right to improve the design of any Trolling Motor without assuming any obligation to modify any Trolling Motor previously manufactured.
8. Serialized "Service-Repair" motors have a (1) one year warranty. Non-serialized "Service-Repair" electric trolling motors are NOT warranted. "Service-Repair" motor denotes a trolling motor sold by MotorGuide that may be "used" but has been inspected and may have had minor repairs. Original retail purchaser of a "Service-Repair" motor is the first purchaser of the motor after it is denoted as "Service-Repair". "Service Repair" motors have a blue sticker on the battery cable and box denoting "Manufacturer Certified Service Repair Motor".

9. TERMINATION OF COVERAGE: Warranty coverage may be terminated for repossessed product, or product purchased at auction, from a salvage yard, from a liquidator, from an insurance company, from unauthorized marine dealers or boat builders, or other third party entities.

10. ALL INCIDENTAL AND/OR CONSEQUENTIAL DAMAGES ARE EXCLUDED FROM THIS WARRANTY, WARRANTIES OF MERCHANTABILITY AND FITNESS ARE EXCLUDED FROM THIS WARRANTY, IMPLIED WARRANTIES ARE LIMITED TO THE LIFE OF THIS WARRANTY, SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER LEGAL RIGHTS WHICH MAY VARY FROM STATE TO STATE.
GENERAL INFORMATION

Boater's Responsibilities

The operator (driver) is responsible for the correct and safe operation of the boat and safety of its occupants and general public. It is strongly recommended that each operator (driver) read and understand this entire manual before operating the trolling motor.

Be sure at least one additional person on board is instructed in the basic operation of the trolling motor in case the driver is unable to operate the boat.

Protecting People in the Water

WHILE YOU ARE TROLLING

It is very difficult for a person in the water to take quick action to avoid a boat heading in their direction, even at slow speeds.

Always slow down and exercise extreme caution any time you are boating in an area where there might be people in the water.

WHILE THE BOAT IS STATIONARY

⚠️ WARNING

A spinning propeller, a moving boat, or any solid device attached to the boat can cause serious injury or death to swimmers. Stop the trolling motor immediately whenever anyone in the water is near your boat.

Shut off the trolling motor before allowing people to swim or be in the water near your boat.

Passenger Safety Message

Whenever the boat is in motion, observe the location of all passengers. A sudden reduction in boat speed, such as a sharp change of boat direction, could throw them off the boat.
GENERAL INFORMATION

Safe Boating Suggestions
In order to safely enjoy the waterways, familiarize yourself with local and other governmental boating regulations and restrictions, and consider the following suggestions.

Use flotation devices. It is the law to have an approved personal flotation device of suitable size for each person aboard and have it readily accessible.

Do not overload your boat. Most boats are rated and certified for maximum load (weight) capacities, refer to your boat capacity plate. If in doubt, contact your dealer or the boat's manufacturer.

Perform safety checks and required maintenance. Follow a regular schedule and ensure all repairs are made properly.

Never be under the influence of alcohol or drugs while boating (it is the law). Alcohol or drug use impairs your judgment and greatly reduces your ability to react quickly.

Passenger boarding. Stop the trolling motor whenever passengers are boarding or unloading.

Be alert. The operator of the boat is responsible by law to maintain a proper lookout by sight and hearing. The operator must have an unobstructed view particularly to the front. No passengers, load, or fishing seats should block the operators view when operating the boat.

Underwater hazards. Reduce speed and proceed with caution whenever navigating in shallow water.

Tripping hazards. To avoid a trip hazard, route all cables and wiring neatly and out of the way.

Report accidents. Boat operators are required by law to file a Boating Accident Report with their state boating law enforcement agency when their boat is involved in certain boating accidents. A boating accident must be reported if 1) there is loss of life or probable loss of life, 2) there is personal injury requiring medical treatment beyond first aid, 3) there is damage to boats or other property where the damage value exceeds $500.00 or 4) there is complete loss of the boat. Seek further assistance from local law enforcement.
PRODUCT OVERVIEW

T30/T34 MotorGuide Trolling Motor

a - Twist-tiller handle  
b - Depth collar knob  
c - Tilt-positioning pin  
d - Transom clamp screws  
e - Shaft  
f - Lower unit  
g - 2-blade power propeller  
h - Steering tension knob  
i - 03 transom mount

WIRING AND BATTERY INFORMATION

Wiring and Battery Information

⚠️ WARNING

An operating or charging battery produces gas that can ignite and explode, spraying out sulfuric acid, which can cause severe burns. Ventilate the area around the battery and wear protective equipment when handling or servicing batteries.

⚠️ WARNING

Performing service or maintenance without first disconnecting the battery can cause product damage, personal injury, or death due to fire, explosion, electrical shock, or unexpected motor starting. Always disconnect the battery cables from the battery before maintaining, servicing, installing, or removing motor components.

Standard Practices and Procedures

When installing or removing this trolling motor, follow these guidelines:

• Disconnect the trolling motor battery from the main engine battery, if equipped.
• Do not use the main engine battery to power the trolling motor.

Battery Recommendations

• Use a 12-volt, deep cycle marine battery.
• Install a 50 A manual reset circuit breaker in line with the trolling motor positive leads within 180 cm (72 in.) of the batteries.
• If extending the existing wire beyond the standard battery cable, use 13 mm (6 g) battery cables.

Battery Precautions

⚠️ WARNING

An operating or charging battery produces gas that can ignite and explode, spraying out sulfuric acid, which can cause severe burns. Ventilate the area around the battery and wear protective equipment when handling or servicing batteries.

When charging batteries, an explosive gas mixture forms in each cell. Part of this gas escapes through holes in vent plugs and may form an explosive atmosphere around battery if ventilation is poor. This explosive gas may remain in or around battery for several hours after it has been charged. Sparks or flames can ignite this gas and cause an internal explosion which may shatter the battery.

The following precautions should be observed to prevent an explosion:

1. Do not smoke near batteries being charged or which have been charged very recently.
2. Do not break live circuits at terminals of batteries because a spark usually occurs at the point where a live circuit is broken. Always be careful when connecting or disconnecting cable clamps on chargers. Poor connections are a common cause of electrical arcs which cause explosions.
3. Do not reverse polarity of battery terminal to cable connections.

Wire and Cable Routing

• Route the trolling motor wires on the opposite side of the boat from other boat wiring.

• Sensitive electronics, such as depth finders, should be connected directly to the main engine battery. Single battery systems require separate connection cables.
WIRING AND BATTERY INFORMATION

Battery Connection

**CAUTION**

Disconnecting or connecting the battery cables in the incorrect order can cause injury from electrical shock or can damage the electrical system. Always disconnect the negative (⁻) battery cable first and connect it last.

**12-VOLT BATTERY CONNECTION**

![Diagram]

- **a** - Power cable
- **b** - 50 A circuit breaker
- **c** - Jumper wire
- **d** - Common ground

Connect the red battery lead from the power cable to the positive (+) battery post. Connect the black battery lead from the power cable to the negative (⁻) battery post.

Install a 50 A circuit breaker in line with the positive lead.

</tr>
</tbody>
</table>
Transom Mount Installation

NOTE: Fits up to 3-1/4 in. thick transoms.

1. Select an appropriate area on the transom of the boat to install the mount.
2. Retract the transom clamp screws.
3. Place the transom mount over the transom of the boat. Ensure the mount is securely positioned.
4. Tighten the transom clamp screw securely.

IMPORTANT: Overtightening the transom clamp screws can weaken or damage the mount bracket.

Stowing and Deploying the Trolling Motor

⚠️ WARNING

Rotating propellers can cause serious injury or death. Never start or operate the motor out of water.

STOWING THE MOTOR

⚠️ CAUTION

Moving parts, such as hinges and pivot points, can cause serious injury. Keep away from moving parts when stowing, deploying, or tilting the motor.
1. Firmly grasp the column and press down on the tilt-positioning pin.

2. Pull back on the column while simultaneously pressing down on the tilt-positioning pin to reach the desired angle.

3. Release the tilt-positioning pin. Verify that the latch pin is securely engaged.
TROLLING MOTOR INSTALLATION AND OPERATION

DEPLOYING THE MOTOR

⚠️ CAUTION

Moving parts, such as hinges and pivot points, can cause serious injury. Keep away from moving parts when stowing, deploying, or tilting the motor.

1. Firmly grasp the column and press down on the tilt-positioning pin.

![Tilt-positioning pin](image1.png)

2. Adjust the angle of the motor to the desired position.

![Angled position](image2.png)

2. Adjust the angle of the motor to the desired position.
3. Release the tilt-positioning pin. Verify that the latch pin is securely engaged.

![Diagram showing tilt-positioning pin and latch pin]

- **a** - Tilt-positioning pin
- **b** - Latch pin

**Adjusting the Steering Tension**

Adjust the steering tension knob to increase or decrease the effort to turn the motor freely.

To fasten the column in a fixed position, tighten the friction strip by turning the steering tension knob clockwise. To unfasten the column from a fixed position, turn the steering tension knob counterclockwise to reach the desired steering tension.

![Diagram showing steering tension knob and friction strip]

- **a** - Steering tension knob
- **b** - Friction strip

**Adjusting the Motor Depth**

Adjusting the depth of the motor improves trolling motor performance in various water depths.
Firmly grasp the column with one hand while turning the depth collar adjustment knob clockwise until the motor column slides freely. To secure the column in the desired depth position, turn the depth collar adjustment knob counterclockwise and then tighten securely.

![Depth collar adjustment knob](image1)

**Depth collar adjustment knob**

**IMPORTANT:** When adjusting the motor depth, ensure the lower unit is submerged 25 cm (9.8 in.) to avoid choppy water or propeller cavitation.

**Speed Control**

Adjust the speed control (five forward speeds and two reverse speeds) to the desired direction and thrust level.

Rotate the twist-tiller handle clockwise for forward movement and counterclockwise for reverse movement. The neutral handle position stops the motor.

![Forward, neutral and reverse handle rotation](image2)

**Forward, neutral and reverse handle rotation**
MAINTENANCE

Trolling Motor Care
To keep your trolling motor in the best operating condition and retain its dependability, it is important that your trolling motor receive periodic inspections and maintenance. We urge you to keep it maintained properly to ensure the safety of you and your passengers.

⚠️ WARNING
Neglecting to inspect, maintain, or repair your trolling motor can result in product damage or serious injury or death. Do not perform maintenance or service on your trolling motor if you are not familiar with the correct service and safety procedures.

Record maintenance performed in the Maintenance Log at the back of this book. Save all maintenance work orders and receipts.

SELECTING REPLACEMENT PARTS
We recommend using original MotorGuide Certified Tough replacement parts.

Inspection and Maintenance Schedule
BEFORE EACH USE
• Check the tightness of the battery lead connections.
• Visually inspect for loose or corroded wiring connections.
• Check the tightness of the propeller nut.
• Check the propeller blades for damage.

AFTER EACH USE
• Disconnect the battery cables from the power source.
• Check the propeller and the propeller shaft for debris such as weeds and fishing line. Remove all debris.
• Check the tightness of the propeller nut.
• Rinse the trolling motor with clean water to remove dirt and dust that may scratch the surface.

EVERY 100 HOURS OF USE OR ANNUALLY
• Periodically lubricate all the pivot points. Refer to Pivot Points.
• Check the tightness of bolts, nuts, and other fasteners.
MAINTENANCE

• Inspect the battery. Refer to **Battery Inspection**.

BEFORE PERIODS OF STORAGE

• Refer to **Maintenance - Inspection and Maintenance Schedule** and complete the appropriate care instructions to prepare your trolling motor for storage.

Lubricating the Pivot Points

To reduce friction, lubricate the following pivot points periodically:

• Pivot pin
• Latch pin
• Tilt-positioning pin
• Tilt-positioning pin spring

**IMPORTANT:** Never use an aerosol lubricant to grease or oil any part of the unit. Many aerosol lubricants contain harmful propellants that can cause damage to various parts of the trolling motor.

</tr>
</thead>
<tbody>
<tr>
<td>95</td>
<td>2-4-C with Teflon</td>
<td>Pivot points</td>
<td>92-802859A 1</td>
</tr>
</tbody>
</table>

Battery Inspection

The battery should be inspected at periodic intervals to ensure proper trolling motor operation.

**IMPORTANT:** Read the safety and maintenance instructions which accompany your battery.

1. Ensure that the battery is secured to the vessel.
2. Ensure that the battery cable terminals are clean, tight, and correctly installed. For installation instructions, refer to **Battery Connection**.
3. Ensure that the battery is equipped with a battery box to prevent accidental shorting of the battery terminals.
MAINTENANCE

Propeller Replacement

⚠️ WARNING
Performing service or maintenance without first disconnecting the battery can cause product damage, personal injury, or death due to fire, explosion, electrical shock, or unexpected motor starting. Always disconnect the battery cables from the battery before maintaining, servicing, installing, or removing motor components.

REMOVING THE PROPELLER
1. Disconnect the power cables from the battery.
2. While holding the propeller blade with one hand, use a propeller wrench to remove the propeller nut.

IMPORTANT: Remove the propeller nut with a propeller wrench. Using another tool may damage the propeller nut or shaft. If the propeller cannot be removed easily, use a rubber mallet to lightly tap the back side of the opposite blade. If the propeller cannot be removed, have the propeller removed by an authorized dealer.

NOTE: If the propeller pin is bent, replace the propeller pin.

MAINTENANCE

INSTALLING THE PROPELLER

1. Rotate the motor shaft to insert the propeller pin horizontally.

![Propeller pin](image)

2. Install the propeller onto the motor shaft by engaging the propeller onto the propeller pin.

![Propeller wrench](image)

3. Install the propeller nut. Tighten securely.

4. Use the propeller wrench to tighten the propeller nut another ¼ turn.

STORAGE

Storage Preparation

The major consideration in preparing your trolling motor for storage is to protect it from corrosion and damage caused by freezing of trapped water.

Refer to the **Maintenance - Inspection and Maintenance Schedule** section and complete the appropriate care instructions to prepare your trolling motor for storage. Store the trolling motor in a dry location where it will not be affected by temperatures below -29 °C (-20 °F).

**IMPORTANT:** Trolling motors stored in temperatures below 0 °C (32 °F) should be operated slowly for a minimum of 15 minutes before going above 30% operation.
**OWNER SERVICE ASSISTANCE**

**MotorGuide Accessories Inquiries**

All inquiries concerning accessories should be directed to your local authorized dealer. The dealer has the necessary information to order accessories for you. When inquiring on accessories, the dealer requires the model and serial number to order the correct parts.

**Mercury Marine Service Offices**

For assistance, call, fax, or write. Please include your daytime telephone number with mail and fax correspondence.
